

Cheese factories & dairy

Bassett Mechanical has the most cheese and dairy experience of any mechanical contractor in the state of Wisconsin. We've worked with corrosive environments ranging from brine tanks to space cooling and air handling. We specialize in system loads and sound refrigeration design. Plus, we understand sanitation problems and space efficiency related to cheese making and dairy industries.

"Bassett has provided functional, efficient design, and thorough and competent installation. Service when needed, has been fast and reliable. We value our relationship with Bassett."

– WALTER P. HEIL JR., Plant Manager,
